

Protecting & Cleaning Your Green Flow Cork Floor

Protect

Place felt pads under chairs and table feet. Never place pot plants directly onto a floor. Always use a pot stand.

Clean

Remove dirt with a vacuum cleaner (brush only) or broom. Grains of sand/dirt may scratch the surface.

Spot Clean

Use Bona Cleaner for spot cleaning as required. For black rubber or shoe marks rub with a dry cloth.

Mop

Regularly mop your floor with Bona Cleaner and a micro fibre spray mop. Allow the floor to completely dry before walking on it.
