Cork Concepts will provide you with a perfect floor without disrupting your life. In one day your floor can be laid and finished with high quality tiles from the Mediterranean forests in Portugal. With Coloured Cork you can create soft and warm flooring as varied as your imagination will allow.

Your tiles are made to order, which means each tile is crafted especially for you. Custom colours are available to match any colour of the Resene paint chart or you can choose from our popular range. Our flooring is made from high density 6mm cork tiles. These are finished with waterborne polyurethane which has low VOCs with an 'R Factor' of 2.6

Cork Concepts cork comes in three sizes:

300 x 300 x 6mm – Traditional small squares

450 x 450 x 6mm – Large square tiles

600 x 300 x 6mm – Rectangle blocks

Coloured cork tiles come with a small 1mm bevelled edge, while Natural (traditional) cork can be laid seamless. No sanding is required until the final coat of waterborne polyurethane is to be applied. The final coat comes with a semi matt finish. We aim to have your tiles delivered to you within two weeks of ordering.

Acoustic Cork Sheets are an excellent product for underlay and insulation. These come in 915 x 610mm x 6mm sheets.

For laying and installing cork please contact Cork Concepts to get a list of our preferred floor layers. Cork is excellent in bathrooms, kitchens, family rooms, bedrooms, toilets, laundries, dining rooms, reception areas, halls, churches, classrooms and theatres.

The Cork Concepts Quality Pledge

Each cork tile is of the highest quality and this is pledged to all of our customers through a rigorous quality assurance system that ensures our tiles are assessed at each stage of their journey from the sustainable cork forests of Portugal to your floor.
